BRIEF INFORMATION

Product-minded Frontend Developer (7+ years) specialising in building scalable **Angular** applications for **Fintech and ERP**. Expert in **performance optimisation** and **UI/UX** implementation. Proactive in **requirements analysis and edge-case discovery**, ensuring robust delivery with minimal rework. Experienced in **mentoring frontend development** and contributing to the full stack with **NestJS**

PROFESSIONAL EXPERIENCE

Frontend developer

Jul 2021 – Mar 2026

Paydock

- **Developed extensive frontend functionality** for the core Checkout feature at a scaling **enterprise fintech platform** (100+ employees), enabling the platform to **onboard new enterprise clients**, contributed to various product features across **different teams**
- Operated as the primary frontend developer in my squad while collaborating on **cross-team initiatives**
- **Improved rendering performance by ~40%** on data-heavy dashboard components by migrating to OnPush change detection strategy, significantly **reducing unnecessary re-renders** across the application
- Improved **team delivery quality** by discussing **edge cases** at the planning phase, **minimising bugs** and **rework**
- Pioneered **AI-driven** testing as one of the early adopters within the company, optimising QA workflows and achieving a **20% increase in feature delivery speed**
- **Standardised development processes** by contributing to **internal style guides** and **accessibility standards** for cross-functional teams, ensuring code consistency
- Conducted regular **code reviews**, maintaining code quality standards across the team
- Contributed to backend tasks using **NestJS** and **MongoDB**

Frontend developer

Nov 2018 – Jul 2021

Ivy Tech

- Managed **frontend development** for **complex ERP system (StoneInk project)** and **web solutions (Love Mercy project)**, progressing from mentored junior to frontend owner.
- Led **solution design, task scoping** and **requirements gathering** directly with clients to **define product roadmaps** and **manage backlogs**.
- Developed reliable web functionality and integrated a payment widget using **Angular, jQuery**, and **Bootstrap**.

SKILLS

Core

- Angular v6-21: Signals, standalone
- TypeScript / JavaScript
- RxJS
- NgRx
- HTML, CSS/SASS
- Testing: Jest, Playwright, Karma/Jasmine
- UI/UX: Tailwind, Material, PrimeNg, Bootstrap
- Security: XSS, CSP
- Accessibility: WCAG, Angular Aria

Backend and Architecture

- NestJS
- MongoDB
- REST API
- JWT
- Nx
- Webpack
- OOP
- SOLID

Workflow and Tools

- Git
- Docker, Docker Compose
- Trunk-based development
- CI/CD
- Storybook
- Code reviews
- Scrum
- Figma, Postman, WebStorm, Cursor
- AI-assisted development

Soft skills

- Adaptability
- Keen eye for details
- Collaboration and teamwork
- Self-management
- Requirement analysis
- Research and learning
- Effective communication

LANGUAGES

English (Upper-Intermediate), **Ukrainian**, **Russian**
